Experience

IT Project Manager (Department of Transportation)   **September 2018 – October 2019**

- Project manager for the Department of Transportation (DOT) enterprise cloud team. Responsible for integrating over 25 system workloads into the DOT enterprise Amazon Web Services (AWS) cloud and Microsoft Azure cloud network.

- Facilitate and organize business and technical interchange meetings amongst cloud solution architects, network administrators, server administrators, application/development teams, and security teams in order to transition applications into the enterprise cloud architecture in accordance with DOT change board processes.

- Serve as the DOT cloud teams website creator and administrator, Jira and confluence page administrator, and Microsoft Teams administrator.

- Collaborate with the application/development team to design the enterprise DevOps model for Amazon Web Services, Microsoft Azure and on-premises systems.

- Lead daily stands-ups, retrospectives, and future planning sessions, utilizing agile scrum and kanban methodology.

Special Background Investigator (CACI International Inc.)   **February 2016 – July 2016**

- Conducted over 75 face-to-face background interviews with neighbors, coworkers, friends, and associates of candidates seeking security clearances.

- Completed record searches at Virginia law enforcement agencies, courthouses, mental health, financial, and educational institutions. Compiled information in clear, concise reports on a standardized form to be transmitted to the Office of Personnel Management.

Military Intelligence Officer (Captain, U.S. Army)   **August 2007 – May 2014**

- Implemented computer-based decision-making management program to analyze and inform $60 million worth of training requirements. Procedures developed and tested were then utilized by Special Warfare Center and School Headquarters.

- During deployment to Afghanistan, incorporated multiple national intelligence databases and assets into combat units to conduct battle tracking and review real time overhead coverage. Integrated early versions of Google Earth, Palantir and ArcGIS into the organizations combat systems toolset.

- Supervised intelligence operations while integrating digital systems in classified intelligence systems.

- Previously held Top-Secret Sensitive Compartmented Information (TS-SCI) clearance.
